[a] The figures for 1841, as published in *Gazette*, are full of errors which cannot now be corrected, and should therefore be used with great caution.

[b] The figures (Persons) for 1847 include 2246 military, women, and children; also 3739 male convicts on public works.

[c] „ „ 1851 „ 953 „ „ „ „ 568 convicts, sex not distinguished.

[d] „ „ 1857 „ 630 „ „ „

[e] The discrepancy in the number of brick and stone houses in 1870 and 1881 arises from a large number of residents in country districts failing to give definite descriptions.

[a] In this table deaths occurring in the Public Hospitals in Hobart and Launceston are referred to the district in which the cause of death originated. [b] This District embraces the New Town Charitable Institution, in which aged persons from all parts of the State are assembled. [c] Deaths occurring at sea or on board foreign ships in port have not been included. [d] Preventable causes embrace deaths at all ages from all causes excepting those classified as due to "Senility" or "Old Age." [e] Corrected for changes in age-distribution. [f] Indicates deaths under 1 year per 1000 births. [g] Computed in accordance with the recommendation of the Conference of Statisticians at Hobart, January, 1902, viz.—That the Age-groups be—Under 1 year, 1 to 20 years, 20 to 40 years, 40 to 60 years, 60 years and over; and that the Population of Sweden (Census 1890) be taken as the Standard. [h] The detailed rates for these divisions are omitted, as the fluctuations between single years when numbers are small give unsatisfactory results.

TRADES, MANUFACTORIES, AND OTHER INDUSTRIES.

WITH regard to the following industries, the aggregates are alone given, as it would not be desirable to localise information to Districts, thereby in many cases unnecessarily disclosing the extent of the business of private individuals or companies, as the case may be.

Unfortunately, the figures given by some establishments in respect of capital invested vary greatly year by year ; such figures can therefore be only regarded as rough approximates.

†"CONSUMABLE WEALTH."—The annual value of Consumable Wealth produced in Tasmania during the year 1911-12—by the combined agency of local labour, skill, and all other animate and inanimate auxiliary instruments of productive physical energy—is estimated to approximate to £8,500,000. This is equivalent to £107 per annum per breadwinner [includes capitalists, entrepreneurs, and wage-earners]. At 3½ per cent this annual contribution of Consumable Wealth represents an absolute present capital value of £242,857,000. It is estimated that about one-seventh of the annual value is absorbed in the maintenance, renewal, and fresh creation of the necessary auxiliary tools and instruments of production and transport. The remaining six-sevenths are absorbed by breadwinners and their dependents, representing a sum of £7,284,560, or 5s. 10½d. per breadwinner per working day. From an economist's point of view each breadwinner may be rightly regarded as one of the most essential instruments of production. If therefore we regard £92, being the average annual effective claim of each breadwinner unit, it follows that each of the latter possesses an asset which, calculated at 3½ per cent., represents a capital value of £2628. ‖ Estimated. § Production (Exports not available). ** Up to year 1901 the revenue of State Departments, since transferred to Commonwealth, was included. *** Not including value of material used or worked up.

NOMINAL AND REAL ASSETS OF A STATE.

The value of the *real assets* of a Sovereign State does not merely consist of its revenue-yielding business undertakings, such as Railways, Post and Telegraphs, nor of its Sinking Funds, Bank Deposits, and other profitable forms of investments.

The fundamental and *real assets* of a Sovereign State consist, primarily, of its right of *claim* to the State's unalienated lands, and, fundamentally, how far it chooses to exert its unlimited power of imposing reasonable taxation upon the annual productions of its various classes of industry.

The *extent and value* of the State's *annual productions*, and the *State's power and legitimate claim over it*, are the *true and fundamental security for the fulfilment of all the State's obligations or debts, foreign or local.*

A common illusion is very prevalent—even among persons of considerable intelligence in other branches of knowledge—that Capital borrowed, by means of State Loans, on the one hand, and Annual Payments by States, in the form of Interest, or Redemption of Debts incurred, on the other hand, are transmitted, altogether, or in a large measure, in some form of money, such as gold, bullion, or specie.

This is altogether a mistaken notion, and, from an economic point of view, is both undesirable and impossible. All interchanges between different countries are made in the form of products of equal exchange value. The Money Standard is merely used as a Measure-equivalent of all such forms of *State Barter*, much in the same way as authorised weigh-bridges are utilized for determining weights of commodities in market exchanges.

The accompanying graphic illustration, in a concrete form, of the actual facts of the *barter* of Australian surplus products for equivalent value of special and necessary forms of Ex-Australian products, during the year 1911, sufficiently demonstrates the truth of the foregoing statements, as regards the *real* nature of *State Barter* (Natural products) and their medium or machinery (Monetary Standards of Clearing House Centres) for effecting the necessary equivalent exchanges of different kinds of products.
